Muscle Ease Body Oil, (3) 16 oz. Skin Repair Body Oil, 16 oz. Body Contouring Oil

## What makes Body XCell so effective?

Body XCell utilizes a powerful, aggressive vibratory percussive action for use on the body and includes nine different specialized applicator heads which allow you to perform: petrissage, effleurage, tapotement, and cupping. The system also includes medium sponge disks for exfoliation and gentle massage. The vibratory percussion of endermatics simulates manual massage and is ideal for effective body contouring.

As you can see, Body XCell System will allow you to go above and beyond simple vibrational and percussive techniques and into new advanced body services with improved results. Featuring breakthrough French manufacturing and digital technology this unit offers unique vibratory and percussive capabilities. Three essential concepts help support this unit: variable speeds, a unique easy to follow protocol and non-invasive technology offering no bruising or pinching on the skin.

## What is the contouring protocol?

- 1) Identify areas of concern.
- 2) Perform light exfoliation using soft sponge and Exfoliating Scrub.
- 3) Apply Celiminate.
- 4) In a deep petrissage movement, apply 4-ball applicator.
- 5) In a light petrissage movement, apply Multi-Prong applicator.
- 6) Apply Body Contouring Body Oil.
- 7) In a tapotement movement, apply Mini-Prong applicator.
- 8) Using suction and cupping, apply Suction with Right Angle Adapter.

- 9) Contouring is the final step used with Body Contour Sponge-- this will give a light buttock lift to end the session

### **Why is this system so unique?**

- Multiple Vibratory Action-Variable speeds offer endless levels of power to fit any client's needs
- Able to perform multi-platform body services
- Dual-line Mobilization Action-Has ability to move both persuasively and perpendicularly
- Percussion Action-Warms the skin

### **Benefits:**

#### **Benefits for Your Clients:**

- Non-invasive, painless sessions
- Exfoliation capabilities leave behind glowing skin
- Helps relax clients through many modalities of massage
- Deep massage

#### **Benefits for Your Business:**

- Perform contouring services, massage, and facials without technician fatigue and in less time.
- Instant profit center with easy-to-learn techniques
- Complements body services including wraps and masks
- Easy to create and combine package deals for repeat customers.
